IT TAKES A VILLAGE TO CARE  
FOR IT'S PEOPLE — OUR ABILITY TO CARE  
IS SLOWLY FADING AWAY

OUR FUTURE IS A  
PLANNED EVENT. IT'S NOT OH  
WELL... WHATEVER HAPPENS

## IT'S A FAMILY AFFAIR

- We are living longer- but are experiencing a health crisis - we are dealing with more illness and chronic diseases than any other time in history. High blood pressure, diabetes, strokes, high cholesterol, and heart attacks are our number one enemies. So, how do we care for one another if we as a people are not well. Who are our caregivers?

- We must reformat the village. What is more important than our health? Yes, we are living longer, but with poor health. Nursing Homes Placements have increased for African Americans. Is this what you want for your future? We must reformat the gates to the village. We as a people know how to give back to our elders as they have sacrificed their lives and have been there for us.

- If nothing is done what will happen?
